

Name: _____ Class: _____ Date: _____

Make Your Own **Study Guide**

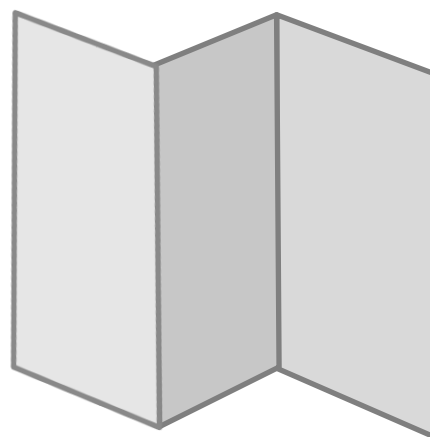

Goal: Make your own study guide over the next two days to help study for the Trimester Exam.

Topics:

- Gravity
- Tides
- Moon Phases
- Eclipses
- The Crater Debate
- **A Book for Columbus**
- Objects in Space
- Interstellar Travel
- The Life of a Star
- Our Solar System
- **Alien Invasion Week**
- Apollo 13

Requirements:

1. Fold your large paper into thirds, accordion-style.
On the front, write “Trimester 2 Study Guide.”
2. Choose four (4) topics from the list above, whichever ones you think you need to review the most.
3. For each topic, make a one-page study guide. Include definitions, pictures, examples, etc.
4. On the back page, cut out specific questions you got wrong on the Unit 4 and Unit 5 test so you can study them.

Suggestions:

1. Use index cards or printer paper and glue on each page (to avoid the ink bleeding through).
2. Decorate your cover page with related illustrations.
3. Use specific examples from your binder or from www.MrAscience.com.
